### Technical data

|   |                                | (mm)    |   |                              |
|---|--------------------------------|---------|---|------------------------------|
| A | External ridge height          | 8620    | Wind load                                     | 0,50 kN/m <sup>2</sup>       |
| B | Internal free ridge height     | 6000    | Snow load                                     | 0 kN/m <sup>2</sup>          |
| C | External side height           | 6551    | Bearing capacity standard floor               | 500kg/m <sup>2</sup>         |
| D | External free height           | 5923    | Column profile                                | 120x200                      |
| E | Roof overhang                  | 320     | Maximum roof load                             | 10 kg/ m <sup>2</sup>        |
| F | Internal free side height      | 6145    | Mounting points in structure                  | Columns and rafters          |
| G | External width of the roof     | x + 980 | Standard fire resistance standard roof covers | DIN 4102/B1<br>M2<br>B-s2,d0 |
| H | Maximum width ground level     | x + 828 |   |                              |
| I | Internal width between columns | x-200   |   |                              |
| J | Bay distance                   | 5000    |   |                              |
| K | Floorheight                    | 183     |   |                              |
