## maxiflex Apse Arcum

### The Apse for the maxiflex Arcum - sophisticated VIP design for top-class events.

The new Apse makes a fascinating addition to the Arcum arched roof. The harmonious arrangement of the tent floor plan is continued by the roof-line curving gently from the

ridge to the eaves. On the inside, this creates a particularly attractive interior atmosphere, which offers a wide range of furnishing possibilities. The supporting construction consists of anodised aluminium, and all steel parts used are hot-dip galvanized. The roof covers

consist of PVC-coated polyester fabric, and the side walls can alternatively be provided with system cassette wall elements of hard-PVC or glass.

Type	15.5/...	20.5/...	25.5/...
System corner dimensions (m)	5.18	20.18	25.18
