Air-transportable Modular Shelters made by Losberger - for quick and professional use

Modular Shelters for aeronautic purposes are made with a stainless steel frame and with high resistance, double coated PVC-fabrics. The structure is set up on plane concrete slabs and anchored to the ground. Complete air and water tightness is achieved with integral flooring. Personnel doors are equipped with anti-panic bars. Covers are available in white desert or standard camouflage colours.

Applications:
Storage, maintenance for material, vehicles, helicopters and aircrafts.

Advantages:
Very light structures, no concrete or water ballast required, only pegs.

Options/Accessories:
- Humidity control
- Air conditioning, heater
- Lighting
- Exhaust fan
- Electrical accessories
- Roller shutter doors: 4,5 x 4,5 m, Manual or electrical opening
- Electrical opening side (on gear)
- Sunscreen

Climate Properties:
- Wind load: 180 km/h
- Snow load: 90 daN/m²

Humidity controlled equipment
Possibility of a continuous hygrometry control avoids the premature material ageing.

The setup cost is really competitive (high reductions of costs).
