

The number one shelter for emergency situations

Based on the same design than the TAG Inflatable Shelters, the Losberger TMM Large-Span Inflatable Shelters can be deployed in less than 40 minutes with 4 people. The shelter offers a surface from 1,125 sqft (3 modules) up to 2,000 sqft (5 modules).

Product description:

In its standard configuration, the Losberger TMM Large-Span Inflatable Shelters consist of 3 interconnectable modules (front, central and rear). By adding central modules, the TMM shelters can be extended up to 440 sqft per module.

The resistance and robust construction of the TMM shelters, along with a set of accessories ensure an efficient use on any kind of land. All shelters can be carried by hand to the place of use.

Thanks to their modular design, the TMM and TAG shelters can be connected to each other in any direction (gable doors and side doors). The tent is made of durable, fire and UV resistant PVC coated fabric (military grade 22 oz/sqyd), using HF welding to construct the cover and floor into one enclosure.

List of equipment:

- Automatic pressure control system
- Internal partition walls
- Internal liners
- External sunshade
- Electric inflator
- Protective groundsheet
- Lighting
- Electrical distribution box
- Heating/AC systems
- Flooring
- Side door(s)
- Connecting & entrance modules
- Printed logos

Fabric colors:

- White, orange, desert sand & dark green
- Other colors on request

Load resistances:

- Wind: 50 mph
- Snow: 2.09 lb/sqft

		TMM 3 Module	TMM 4 Modules	TMM 5 Modules
Floor Space (sqft)		1,125	1,570	2,000
External dimensions	Length (ft)	41'6"	57'8"	73'10"
	Width (ft)	27'2"	27'2"	27'2"
	Height (ft)	13'5"	13'5"	13'5"
Number of arches		6	7	8
Weight per module (lb)	Front module	399	399	399
	Central module	437	437 (x2)	437 (x3)
	Rear module	437	437	437
	Total	1,273	1,710	2,147
Setup time (min)		40	50	60
Setup crew (persons)		4	6	8
Tents per 20' container		5	4	3
